## Allowable Subject Matter

Page 2

- 1. Claims 1, 3, 6, 7, 9, 12, 13, 15 and 18, which have been renumbered as 1-9 respectively, are allowed.
- 2. The following is an examiner's statement of reasons for allowance: Regarding claims 1-9, the prior art of record fails to teach of integrating wireless and wireline functions within a communications network comprising: a network edge switch for linking the wireless and wireline functions to and from the communications network by transferring the wireless and wireline data to the asynchronous transfer mode infrastructure from the network access function within the network edge switch. The closest reference, Brody et al. (U.S. Patent No. 6,278,697), teaches of integrating wireless and wireline functions within a communications network comprising a network edge switch bút fails to teach of linking the wireless and wireline functions to and from the communications network by transferring the wireless and wireline data to the asynchronous transfer mode infrastructure from the network access function within the network edge switch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
